PROFESSIONAL SUMMARY

Product-minded technologist with 2 years of experience across fintech and SaaS, translating business requirements into user-centric software. Experienced in stakeholder collaboration, user story writing, and cross-functional product delivery. Pursuing an MBA in AI for Business at BITS Pilani (WILP), with electives in AI product management.

CORE COMPETENCIES

Requirements Gathering • Stakeholder Management • User Story Writing • Cross-functional Collaboration • Feature Prioritization • Sprint Planning • UX Reviews • Product Thinking • API Trade-off Analysis • Business Impact Analysis

PROFESSIONAL EXPERIENCE

Software Engineer Jul 2025 – Present
Hexamap Solutions Chennai, India

- Led client discovery calls, translating business requirements into user stories and technical specifications; improved sprint planning and release processes for more predictable deliveries.
- Owned end-to-end delivery of the TUFIDCO project management dashboard, collaborating with stakeholders to define workflows, validate UX, and incorporate feedback; consolidated four content pages into a single view, improving usability and page performance.
- Implemented session-based caching to reduce API calls and improve responsiveness; collaborated with designers to deliver production-ready UI/UX improvements and React interfaces for IUCN/FARA project modules.

Backend Developer Intern Feb 2025 – May 2025
ParkQwik Chennai, India

- Designed and implemented modular slot allocation logic for a smart parking platform, addressing a core product problem: peak-hour double-booking — estimated ˜40% reduction in incidents post-deployment.

Application Support 2022 – 2023
FIS Payment Solutions and Services Chennai, India

- Served as the bridge between business stakeholders (bank managers) and the technical team during UAT cycles — facilitated scheduled calls to gather client feedback, documented issues, and ensured fixes were validated before release.
- Diagnosed a critical page rendering issue causing 6–8 second delays affecting ˜15–20 bank manager users; implemented lazy loading to reduce load time to under 1.5 seconds — a 75%+ improvement in perceived performance.
- Managed end-to-end ticket lifecycle: first-level troubleshooting, root cause identification, routing, and closure within defined SLA windows.

EDUCATION

MBA – Artificial Intelligence for Business, BITS Pilani (WILP) | Elective: Product Management 2025 – Present
B.Tech – Electrical & Electronics Engineering, SASTRA University 2020
Sound Engineering & Music Production, BLU Academy 2021 – 2022

CERTIFICATIONS

Full Stack Web Developer Programme — GUVI Geek Networks / Zen Class

SKILLS

Product: Requirements Gathering, User Stories, Stakeholder Communication, Feature Prioritization, Sprint Planning, UX Review, Agile.
Technical: JavaScript, React.js, Node.js, REST APIs, PostgreSQL, MongoDB, SQL
Tools: Jira, Figma, Notion, Git/GitHub, Postman, Excel
Soft Skills: Client Facilitation, Cross-functional Collaboration, Problem Framing, Structured Communication
Languages: Tamil, English, Telugu, Hindi

PRODUCT CASE STUDIES

Blinkit Surge Fee → Surge Coins View case study
Loyalty-loop model to reduce surge-pricing friction and improve GMV.

Zomato Personalised Food Recommendation View case study
AI-driven recommendation concept to improve discovery, retention, and repeat orders.

PROJECTS

Social Media Application React, Node.js, MongoDB, Firebase
Real-time full-stack social platform with authentication and user interactions.

E-commerce Website Full Stack
Product catalog, shopping cart, and payment gateway integration.

Weather API Dashboard JavaScript, REST API
Real-time weather dashboard using public APIs.
